Habit Mastery League

Mobile App Development

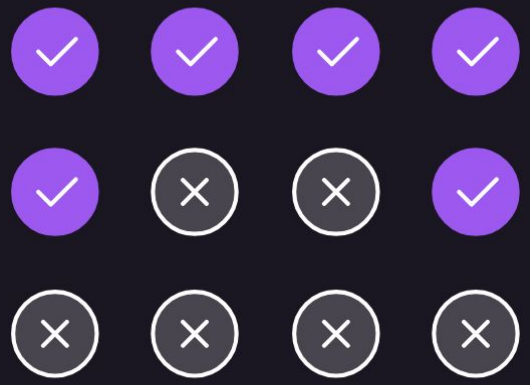
Uddhav Cota

Consistency is the hardest part

1. Motivation Fades
Enthusiasm drops after the first few days without immediate results.

2. Tedious Tracking
Manual journaling or complex apps create friction.

3. Invisible Progress
Without visual feedback, users feel like they're stagnating.



The "broken chain" effect destroys motivation

Core Features

Add Habits
Quickly input name & description

Progress System
Visual feedback loop

Complete Toggle
One-tap daily completion

Dark Mode
Full theme support

Splash Screen
Branded launch experience

Data Control
Delete single or all habits

Tech Stack

Flutter

Cross-platform UI toolkit. Enables beautiful, native-compiled applications from a single codebase.

SQLite

Local Database. Robust, persistent storage for habit data without needing an internet connection.

SharedPrefs

Key-Value Storage. Perfect for lightweight settings like Dark Mode preferences.

Database Schema

Table: habits	
id	INTEGER PRIMARY KEY
name	TEXT
description	TEXT
progress	INTEGER

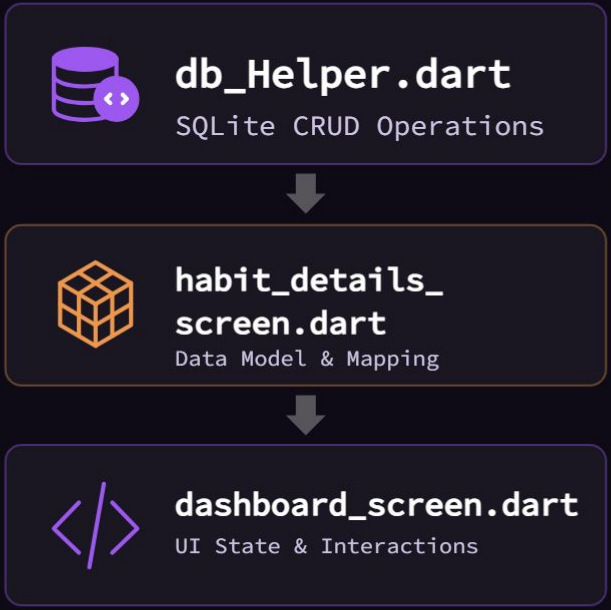
Code Structure



Challenges Solved

Schema Changes

Managing database migrations and field updates without data loss.

UI Sync

Ensuring the dashboard instantly reflects database state changes.

Navigation

Handling state refresh when returning from settings or add screens.
